ORDDW-MGD 471.94(5)

SUBJECT: Information on REDSTONE Missile (1)

APR 19 1955

TO: Commandant  
The Artillery School  
Fort Sill, Oklahoma

ATTN: Major Zurek  
Dept. P and NRT

1. Forwarded for your information and retention are two (2) booklets on ground handling equipment for the REDSTONE Missile.

2. The booklet is in loose leaf form in order that changes in the system may easily be substituted. Any changes will be forwarded your installation for insertion in the booklets.

FOR THE COMMANDING GENERAL:

1 Incl

1. Booklet - "Ground Handling Equipment for REDSTONE Missile" (in dup) Cpy Nr. 9 and Cpy Nr. 10

## FOREWARD

1. Guided Missile Development Division, Ordnance Missile Laboratories, Redstone Arsenal will present the REDSTONE Missile System in two (2) volumes.
  - a. Part I - REDSTONE Missile Components.
  - b. Part II - Ground Handling Equipment.
2. Since the tactical end-solution for the ground handling equipment is more advanced and most of the items can be displayed in their final tactical shape, this booklet has been prepared first. Inasmuch as the components for the missile itself, especially with respect to the guidance and control equipment, are still in R & D phase publication of Part I, "REDSTONE Missile Components" is not practical at this time.
3. Part II displays all of that equipment which is used at a launching site to fire a REDSTONE Missile. The entire volume is broken down into special groups to facilitate its use.
4. Chart I, preceding the Index, presents a breakdown of firing site equipment and lists that equipment which will be carried on specific vehicles.
5. In view of the fact that some ground equipment has not been finalized, it is impossible to illustrate each individual item of equipment. However, such equipment is described briefly in the accompanying paragraphs.
6. Items common to the service are not pictured.
7. GMDD will provide illustrations, as soon as available, for insertion in the proper space. New pages, reflecting maintenance procedures, utilization of special tools and devices, nomenclature, drawing numbers, or superseding items now listed, will be distributed as they become available.
8. Purpose of this distribution is to insure that all volumes are maintained on a current basis.

PART II  
GROUND-  
HANDLING EQUIP.

# FIRING SITE

	VEHICLES AND TRUCKS	TEST AND CONTROL EQUIP.	MECHANICAL EQUIPMENT	ELECTRICAL EQUIPMENT	MAINTENANCE EQUIPMENT & TOOLS	SAFETY EQUIPMENT	SPECIAL EQUIPMENT
1

## PART II GROUND EQUIPMENT

REDSTONE  
MISSILE

Test and Control Equipment

ITEM: Voltage Detector

FUNCTION: To indicate any random voltage which may appear across the detonator circuit due to switching in other circuits or due to induced voltages.

DESCRIPTION: Type: Redstone

Weight and Dimensions: Consists of a magnetic amplifier which works into a relay which operates a light, a warning horn and a pen of the sequence recorder. The test circuit detects positive or negative DC voltages as well as AC voltages as low as 0.25 volts and pulses as low as 0.5 volts and as short as 3.5 milliseconds.
